Ludo Board Game Is an Innovative Block Chain-Based  
Web 3.0 Game

# Ludo Board GAME White Paper

Prepared by  
**Gwen E Morgan**  
8 June 2023

- **Abstract:**

The Ludo Board Game is an innovative Blockchain-based gaming project that offers players the opportunity to earn cryptocurrencies and collect unique Non-Fungible Tokens (NFTs) while enjoying the classic Ludo game. This whitepaper outlines the vision, mechanics, tokenomics, and NFT integration of the Ludo Board Game Play-to-Earn ecosystem.

- **Introduction:**

2.1 Game Mechanics: -----

2.2 Earning Mechanism:-----

1. Ludo Tokenomics: -----

3.1 Native Token – LUDO-----

3.2 Token Distribution-----

3.3 Token Utility-----

- NFT Integration:-----

4.1 Collectible Game NFTs:-----

2. Roadmap:-----

3. Conclusion:-----

- **Introduction:**

The Ludo Board Game is a decentralized application (DApp) built on the Solana Blockchain, providing a secure and transparent environment for players to participate in the Ludo game, earn cryptocurrency rewards, and collect exclusive NFTs

- **How Ludo Works:**

### **2.1 Game Mechanics:**

Players join a virtual game room to participate in a standard Ludo match.

Each game room consists of 2 to 4 players who take turns rolling dice and moving their tokens on the board.

Players can form their game rooms or join existing ones.

The game follows traditional Ludo rules for fairness and familiarity.

### **2.2 Earning Mechanism:**

To earn cryptocurrency rewards, players need to stake a certain amount of native utility tokens of the Ludo ecosystem.

The winning player(s) receive a percentage of the total staked tokens, distributed based on their performance in the game.

A portion of the staked tokens will be utilized to maintain the ecosystem, fund development, and reward community engagement.

## **1. Ludo Tokenomics:**

### **3.1 Native Token - LUDO:**

LUDO is a Solana Ecosystem standard utility token that powers the Ludo ecosystem.

It acts as the in-game currency for staking and rewards distribution.

Players can acquire LUDO tokens through exchanges or by participating in the Ludo game.

### 3.2 Token Distribution:

**Initial Token Supply:** 10B LUDO Tokens.

- **Token Distribution:**

40% - Public Sale and Community Engagement

30% - Liquidity

10% - Marketing and Partnerships

10% - Airdrop

10% - Advisors and Early Supporters

**Token Distribution**

■ Public Sale ■ Liquidity ■ Marketing & Partnership ■ Airdrop ■ Advisors and Early Supporters

### 3.3 Token Utility:

- **Staking:**

Players need to stake LUDO tokens to participate in the Ludo game and earn rewards.

- **Governance:**

Token holders can participate in protocol governance through voting mechanisms to suggest and decide platform upgrades.

## 2. NFT Integration:

### 4.1 Collectible Game NFTs:

Ludo will offer unique NFTs that players can collect during gameplay.

NFTs may represent rare in-game items, special tokens, or cosmetic upgrades for their Ludo board and game pieces.

### 4.2 NFT Rewards:

Players have the chance to earn NFTs as additional rewards based on their performance and achievements in the Ludo game.

Some NFTs may be limited edition or have varying levels of rarity, making them more valuable and desirable within the Ludo ecosystem.

## 2. Roadmap

**Q2 2024:** Smart contract development, Token creation, and Security Audits, Exchange Listing.

**Q4 2024:** MVP Launch - Basic Ludo game and staking functionalities.

**Q2 2025:** Platform enhancements, Cross-chain integration (optional).

**Q3 2024:** Play-to-Earn functionality integration, UI/UX improvements and NFT implementation.

**Q1 2025:** Mobile App goes live operate with full functionality, delivering a seamless and comprehensive user experience.

### 3. Conclusion:

The Ludo Board Game Play-to-Earn ecosystem revolutionizes the way traditional board games are played by combining the fun of Ludo with the benefits of blockchain technology. Players can earn cryptocurrencies by participating in a secure and fair environment, fostering a thriving gaming community.

- **Disclaimer:**

This whitepaper serves as a conceptual document and does not guarantee the actual implementation of the described project. Tokenomics, distribution percentages, and other aspects are subject to change based on the project's requirements and feedback from the community and legal regulations.
